

The background of the entire page is a blue-tinted photograph of a laboratory setting. In the foreground, several clear glass test tubes are visible, some containing a light-colored liquid. A pipette is positioned in the center, dispensing a drop of liquid into one of the tubes. The background is slightly blurred, showing more laboratory equipment.

The Ψ Φ Love

Part 1

By Omie

Will be at work tonight....
8:30 Dad

All efforts
wasted

Hold on mom.
I will also
join u

Could you please
stay outside ?
Operation will
start in some
time..

Yeah sure.
Just tell me
the speciality
of the case

The patient had
an accident, has
a badly damaged
spinal cord; is
constantly
pointing towards
his head and.....

And what
doctor ?

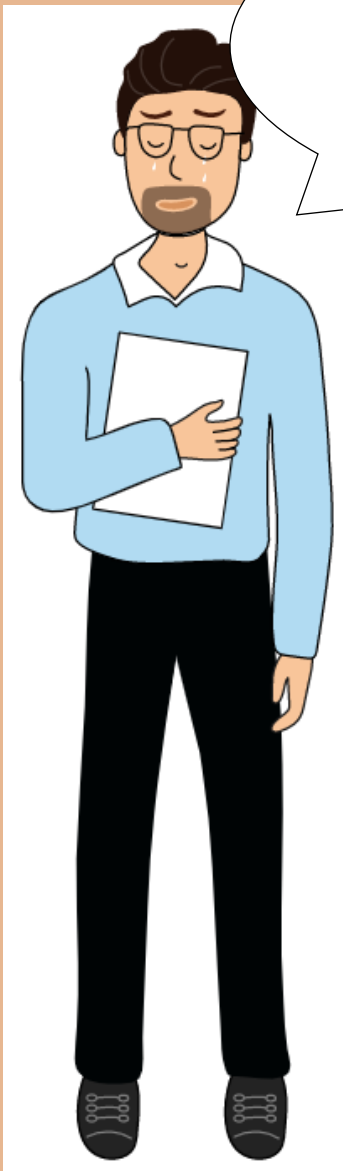

And he is your
dad

But that's
impossible. He
messaged that he
would be at work
for the night

Yeah, he said so. It was supposed to be a surprise for u. But then he started from office and this..

The brain... He is asking to save the brain

Go get the brain ventilator ready. We don't have much time

Hurray operation successful. Brain was saved.

The Brain Ventilator was a device made by my mom Dr. Rashi and dad Dr. Ravi. It could keep the brain alive even when the body is dead.

Dad's body got paralysed but brain was safe. I didn't know whether to be happy that brain is safe or sad that body is dead.

I cried but mom didn't. She was a tough woman..

Next Day...

The thinking
brain

Good Evening Ladies and Gentlemen. I am here to announce a great gift given to the scientific society by noble laurate late Dr. Ravi. His body became paralysed, so he has given his magical brain so that we can develop. And we will call it...

The Ravi Box

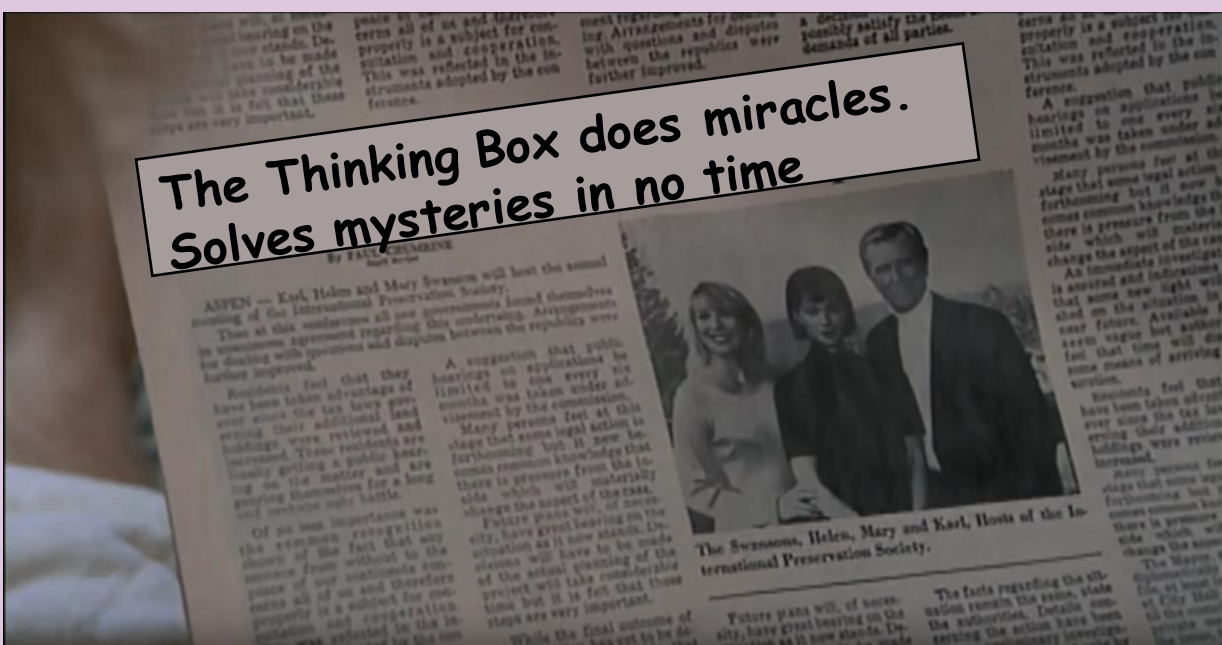

Let's combine
it.
**The Thinking
Box**

And that day onwards, the brain became a new supercomputer for the society and got the name "**The Thinking Box**"

What did this 'Thinking Box' do ? Read on to find out....

The Thinking Box does miracles. Solves mysteries in no time

What is the solution of grandfather paradox ?

How can we physically understand spin ?

Questions were asked and answer were obtained from the Thinking Box.

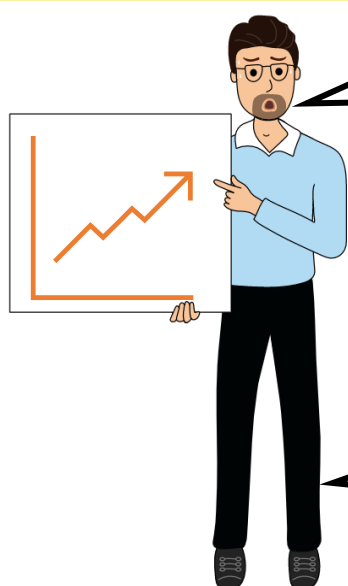

When Questions were long, Reports were sent and the box used to read and solve them.

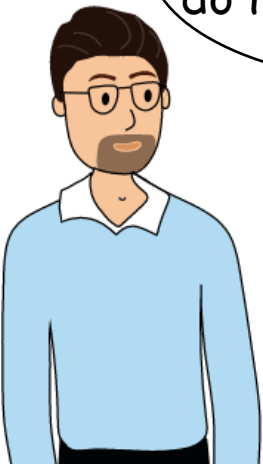

It was all good till one day.....

Sir please at least see at this once. There is something. Please let me talk to the Thinking Brain.

I have told u repetitively Dr. Ranjan that we can't waste the Thinking Box's time to do your calculations.

Sir I have done the calculations again and again. Can't be an error.

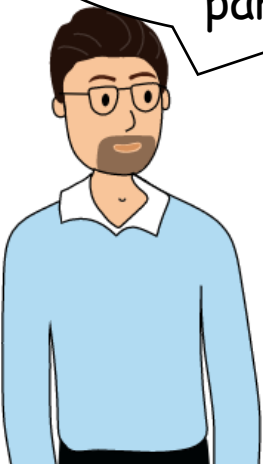

Hey Rashmi ! Can you do me a favour ?

Do I know you ?

Oh yeah. I forgot to tell u. I am a scientist at your parent's lab

That's great uncle. Please tell how can I help you.

I am working on a project but they are not letting me talk to the Thinking Box.

Thanks a lot dear

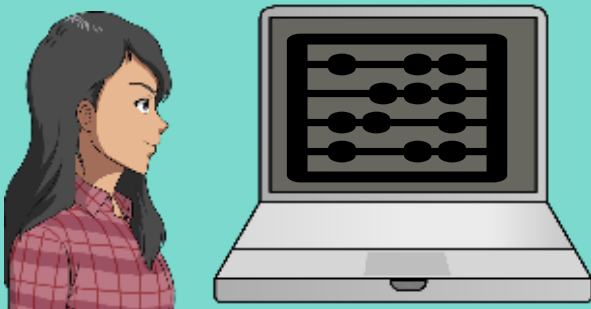

But I should tell mom about it. She will help uncle herself

Ok. Don't worry. I will mix it with my mom's files and your report will go to the Thinking Box.

And the next Day

What are u doing mom ?

Nothing much.
Just talking to an
AI that mimics
your Dad

Really ? What
does it say ?

It's time !!

I didn't get it.
Anyways, I want to
tell u something
about Dr. Ranjan. He
needs your help.

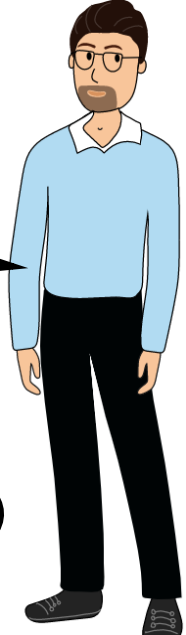

I told mom the entire
story. She promised to
help.

Next day, they met in a
coffee shop. I was very
curious and was sitting
on nearby table to hear it all

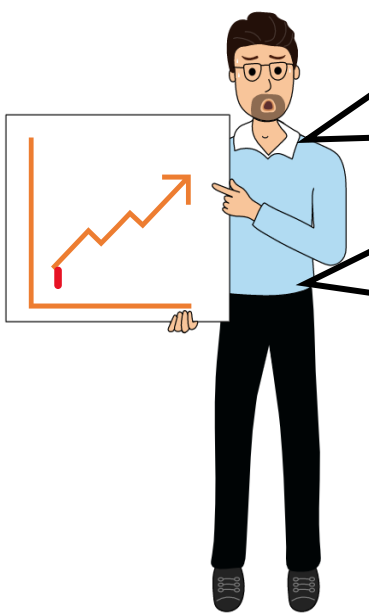

Yes Dr. Ranjan. Please tell me what difficulty u r facing

Ma'am I don't know whether I should ask you this. I might be wasting your time.

What kind of scientist are you if u r afraid of experiments. It is always a new learning, never a waste of time

There are major Peaks and valleys here, right ?

Perfect. Now see this small peak in left. It has no pair. That's where I have a doubt

Yeah correct. They correspond to Cerebrum A and B and their pairs

Yeah. Looks to be some issue. Maybe...
Interference from Mendelian nerve signals

Oh. Ok. Thanks a lot mam.

A cricket ball came and hit Dr. Ranjan which marked the end of the meeting... :)

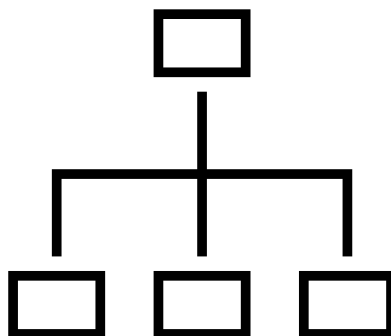

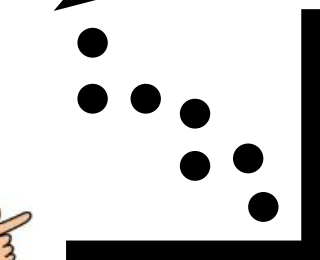

Whose ball is this ?

After a week

Mam, it can't be mendelian nerve signal. I have done this experiment to prove that the Mendelian nerve has an entirely different field...

You might find it silly ma'am but this idea was given by a scientist who came in my dreams

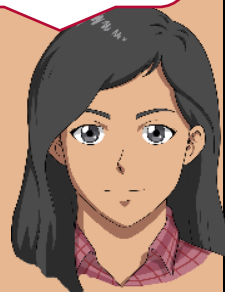

I'm bit afraid of saying this but these are the readings of the Thinking Box and I conclude that it is not a real brain.

After another hour

I must say it was a nicely planned expt. How did u get the idea ?

No worries. It happens with all great people. Anyways, what conclusion do you draw out of it ?

WHAT DO YOU MEAN TO SAY? WE SCIENTISTS HAVE FAKED IT? MY HUSBAND'S DEATH IS A JOKE? ALL OF US ARE LIARS? JUST GET LOST. Don't say a word.

I had never seen mom that angry. Will Dr. Ranjan quit? Or will there be another quarrel? Read on to find out....

That evening

What does it
say this time
mom ?

Nothing... Just an
old college memory..

Anyways, Here's a
letter for you. I have
kept it on the table

Fine, you just come and
have supper. We will see the
letter later.

After supper, we read the letter together. It went as follows

Congratulations

I, the president of the royal society is glad to announce that, your husband has helped the national intelligence to avoid a war. Now that the bay is clear, it is time to thank him. Kindly arrange for the royal celebrations..

*President
Royal Society*

Next day

Congratulations.
You must be proud
about your dad.

Thank you,
Dr Ranjan.
And sorry
for mom's
anger that
day

No issues about that. I just wanted to
ask why didn't they give the award yet ?

Maybe they are busy counting his qualifications..

Or maybe, he isn't dead yet. This prize is given only to martyrs. That's how I can say that the Thinking Box is fake.

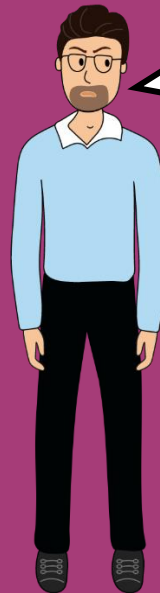

I would have killed Dr Ranjan right there if president wouldn't have said

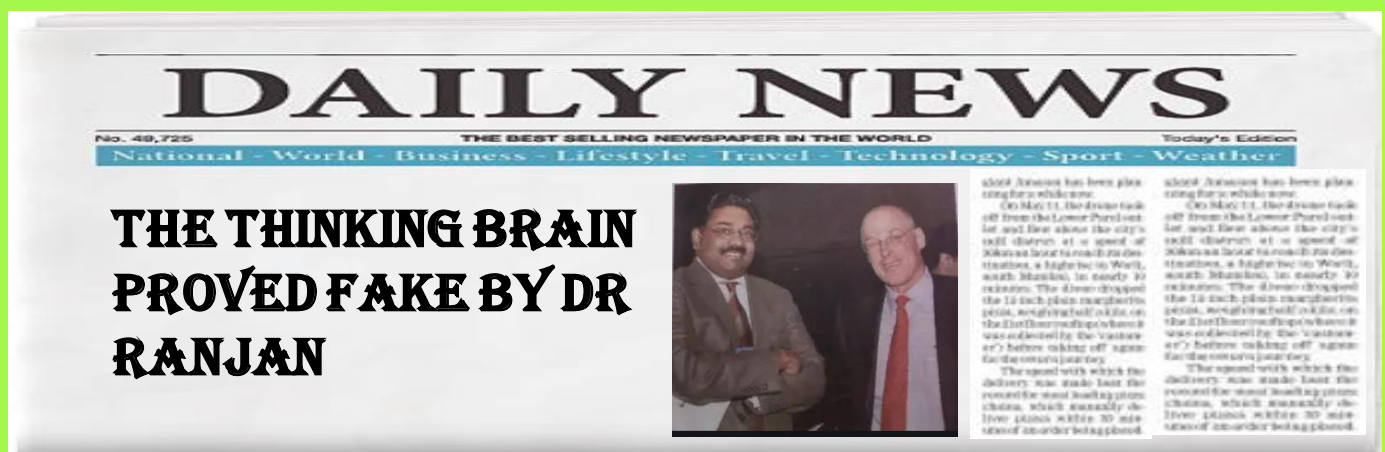

Good evening ladies and gentlemen. I invite Dr Rashi to take the HiSpy award on behalf of Dr Ravi

This can't be true. But yes... "Humans can lie but science can't..."

Saying so he left the place

2 months later, a headline came in the newspaper

That evening Dr Ranjan came home

Congratulations Dr Ranjan.
You have proved us wrong.
Now let's go. Someone is
waiting for you

I tried to follow them but of no use. I was very puzzled now. If mom knew it was fake brain, why didn't she tell us? And if it is fake, where is dad?

She didn't talk about it till a week until she came up crying with this letter in her hand.

*Dear Rashi,
They somehow came to know about this technique of ABC. But they don't know how to use it. Hence, I am destroying our brains and body. No one else, other than both of us, not even you know the complete process of using it. We should be happy. Our country is safe.*

Love for both u and daughter Rashmi. "

Now, I was in worst of my confusions. Firstly, If "**both**" weren't mom and dad, who else was it then? And what was this ABC business? Read on to find out...

Then Mom started telling the whole story

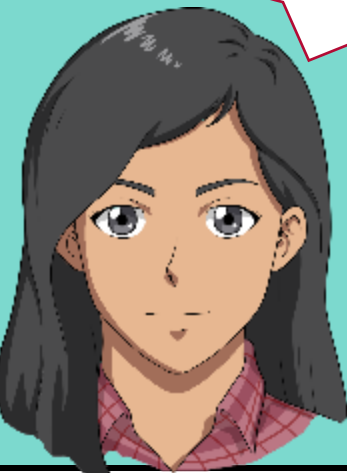

ABC stands for Artificial Body Control. Ur dad had invented it and was using it for the country's defence system to provide sensitive information about enemy troops.

Remember that day he had went out? He was on this job only. But he wanted an heir for this technique. So, we played this play. We made a fake body; had an accident for it then got the brain out. He had on purpose made an error in brain making so that he gets the perfect scientist who can point out stuff, that too even if the entire world opposes him.

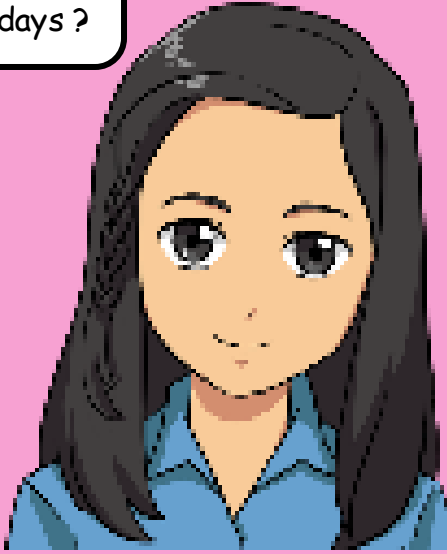

Dad was a genius.
I suppose Dr Ranjan was this man.

Yeah. Right. And the AI was also none other than ur dad messaging me. That's why he said, "good acting". Do u remember that a ball came and hit Dr Ranjan at the end ?

Yes, I do. Was a hard hit. What about that ?

That was another device made by ur dad and me. It was a dream controller. The person who gave all ideas to Dr Ranjan was ur dad only..

Impressive. But where was he all these days ?

He was in his underground Lab where I took Dr Ranjan that day. He was teaching him the technique. All was going well and then this letter.....

Dad is a hero mom. U should be proud about him. Now please get some rest

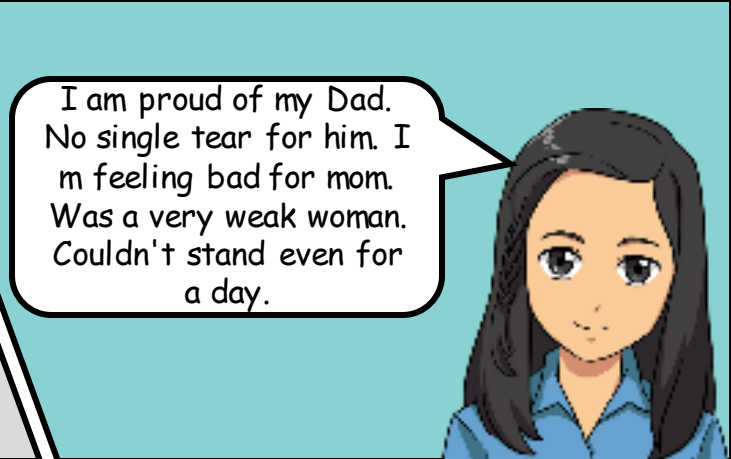

I was feeling very proud to be daughter of a national hero.

But next morning, all my joy was crushed by the news of my mom's death. She loved him so much that she could not live even a day without him...

I was left here. All by myself. Not knowing what to do. But my life changed when a facebook friend visited me personally...

Felt bad about
your parents

I am proud of my Dad.
No single tear for him. I
m feeling bad for mom.
Was a very weak woman.
Couldn't stand even for
a day.

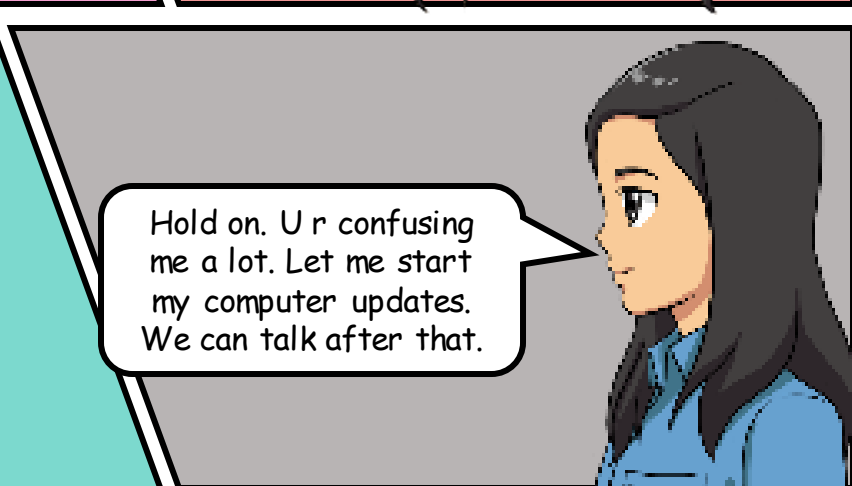

Only if she could
have beared for one
week, she would have
been alive today.

What do u mean to say?
And why r u looking at
the clock again and
again?

Because I need to
remember what u
need to forget.

Hold on. U r confusing
me a lot. Let me start
my computer updates.
We can talk after that.

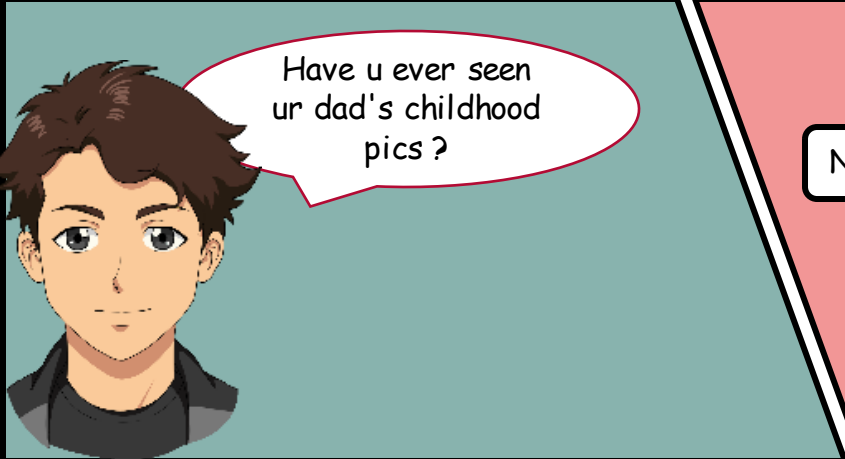

Sure.

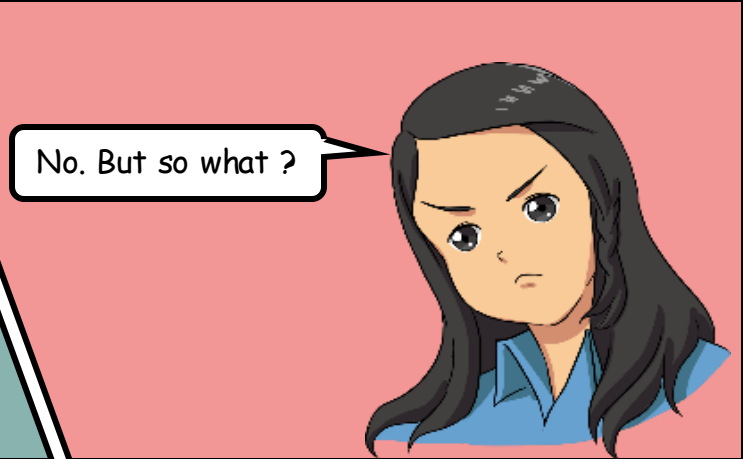

After 2 minutes.

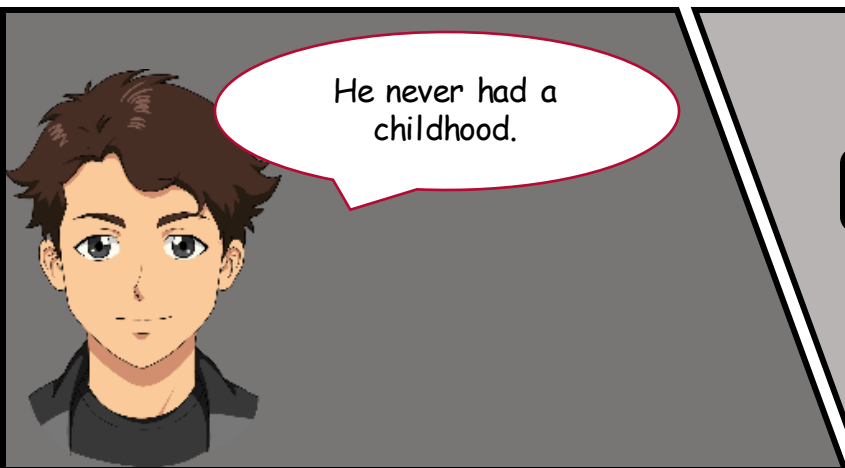

Yeah please continue.

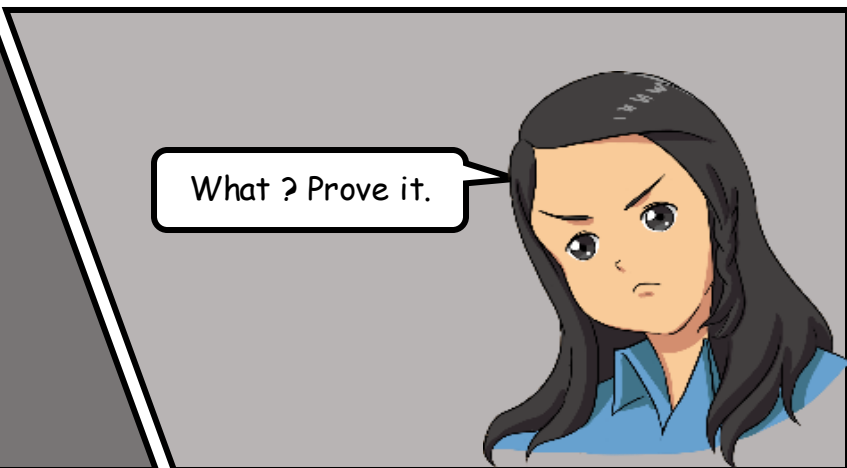

Have u ever seen
ur dad's childhood
pics ?

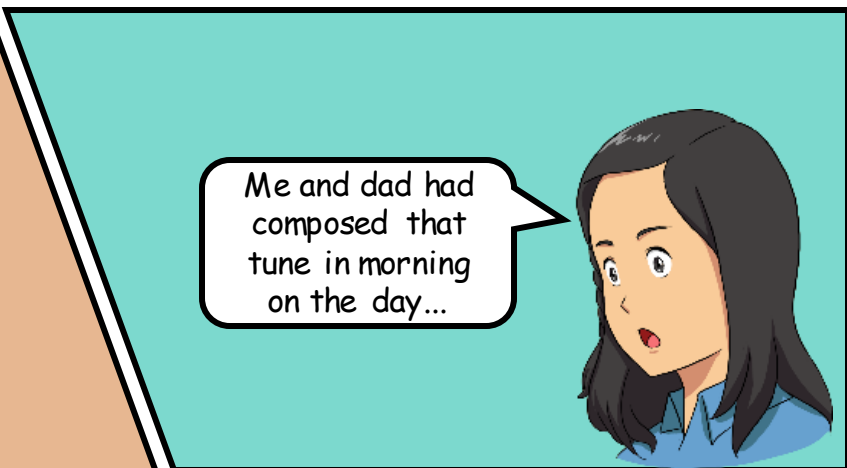

No. But so what ?

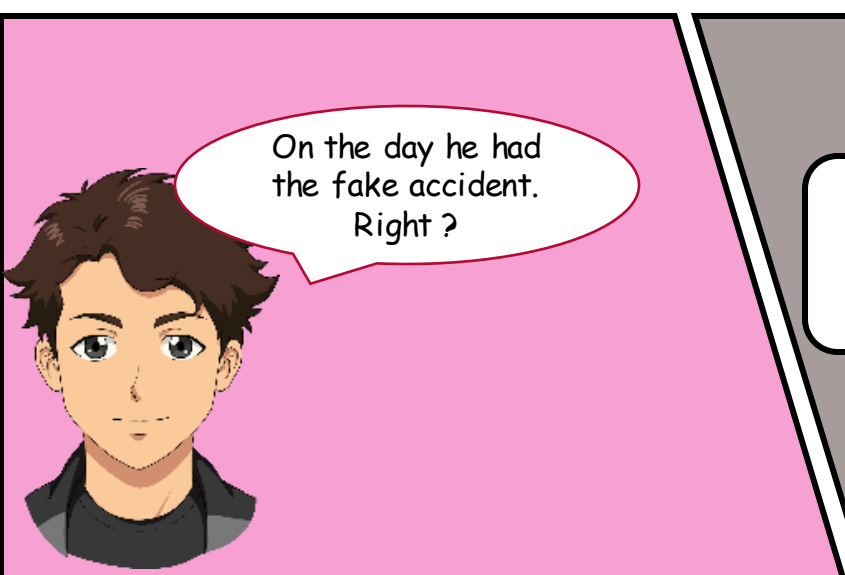

He never had a
childhood.

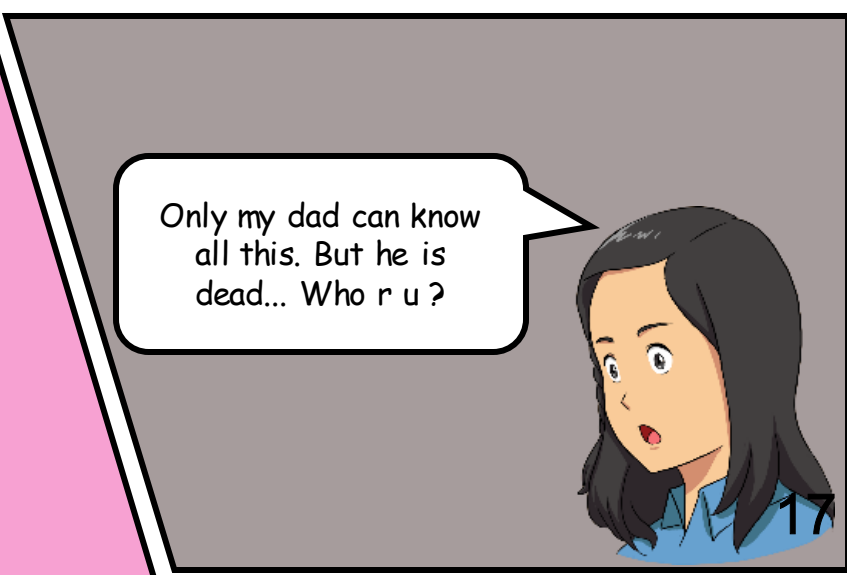

What ? Prove it.

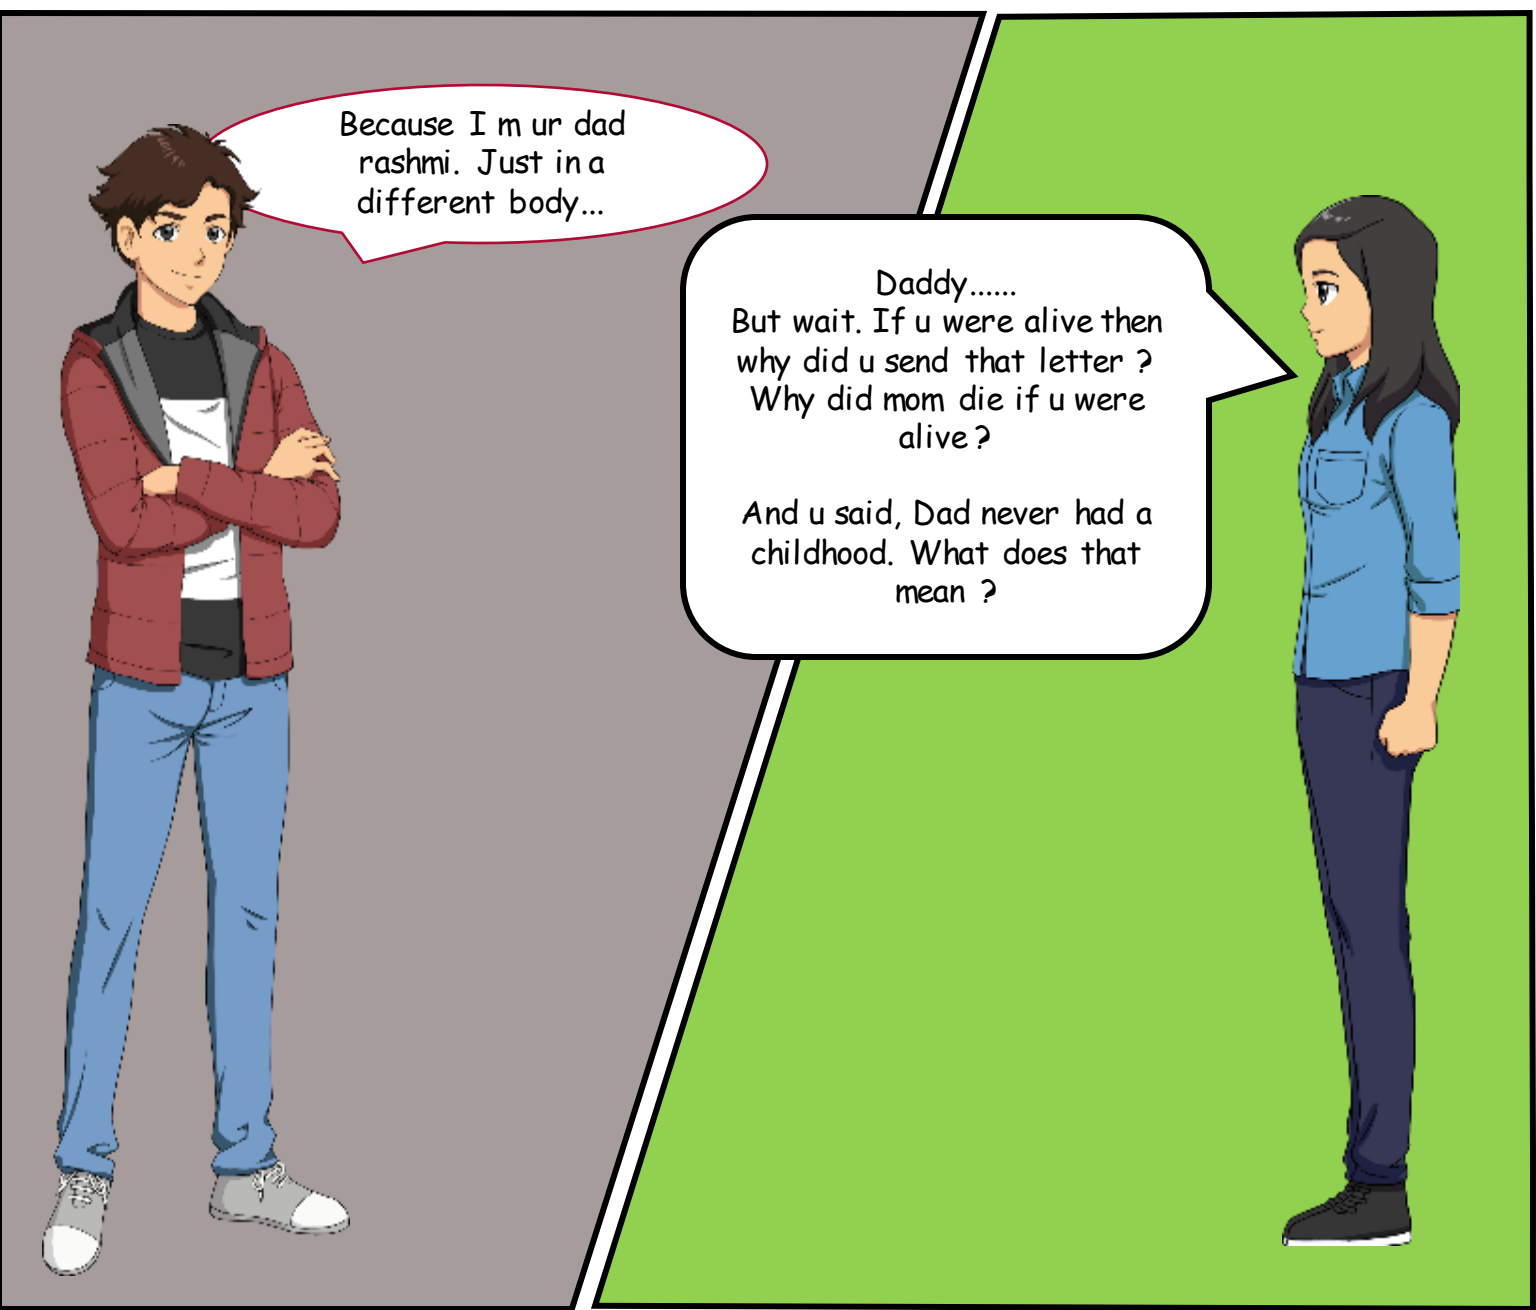

Me and dad had
composed that
tune in morning
on the day...

On the day he had
the fake accident.
Right ?

Only my dad can know
all this. But he is
dead... Who r u ?

Because I m ur dad
rashmi. Just in a
different body...

Daddy.....
But wait. If u were alive then
why did u send that letter ?
Why did mom die if u were
alive ?

And u said, Dad never had a
childhood. What does that
mean ?

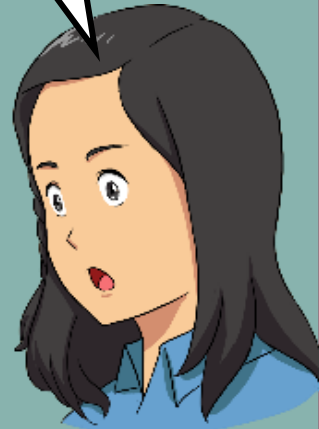

Is he talking truth ? Is he lying ? Is he a
terrorist ? Read on to find out the real truth.

I did the death drama because I just wanted the enemies to think beyond any doubt that the technique is destroyed. But your mom couldn't wait.

And about the childhood thing, That's because even ur Dad wasn't the original man. Your grand dad was the original one. And from then on, brain is same, just the body is changing. That's why u could never see ur Grand dad. I as your granddad had married my own daughter but with a different body.

But daddy, I mean grand pa. I mean... I don't know what to call u. But why did u do this ?

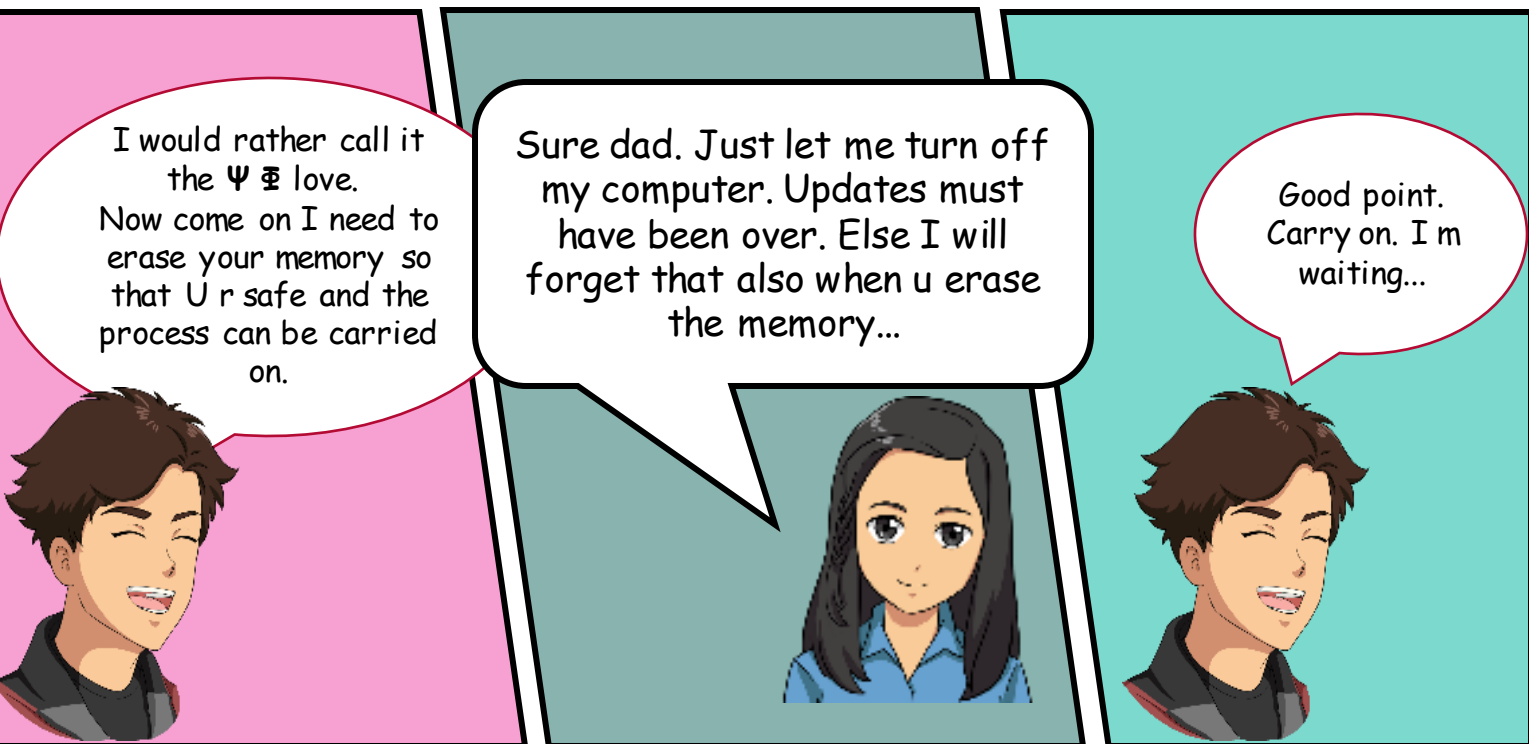

That's because I love science. One Lifetime wasn't enough for me to study everything I wanted to. Hence I just kept changing body, the brain being the same. Even this body is being controlled by that original brain. As you might know, in one lifetime, we can use only 10% of our brain capacity. So, I thought, why not to live for ten lifetimes and use it till the fullest. Your mom was a scientist. So I just planted memories of marriage in her and we started working together."

Dad, I m very very proud of u. Really U are true lover of Science and nation. People say it correct only... U don't have human love. U have a sci fi love.

THE END ?
